

IoT Inspector is a security startup that develops a SaaS platform for organizations and cyber security professionals to automatically examine the firmware of IoT devices for vulnerabilities and conformance deviations.

Join our team if you are enthusiastic about IT security, want to work with the latest technologies, and care to bring security to the IoT world. In order to grow our team, we are looking for a

## **DevOps engineer (m/f/x)**

**Location: Budapest, Hungary**

### **We are looking for you if you**

- are a creative problem solver;
- want to build a modern UI for a scalable cloud application;
- are interested in IT security (penetration testing, reverse engineering, vulnerability research);
- want to work with an enthusiastic team.

### **Responsibilities:**

- leading and maintaining our move of the current platform to the cloud
- identifying technical problems and apply software updates and 'fixes'
- investigating and resolving technical issues
- designing procedures for system troubleshooting and maintenance
- creating & maintaining documentation, operating procedures, and playbooks
- working in an agile, collaborative environment to build, deploy, configure, and maintain systems
- working with development teams to enable CI/CD environment
- designing and implementing strategies for delivery, monitoring, checks, and alerts
- designing and implementing infrastructure as code using cloud standards and methodologies with cloud security standards in mind
- working with state-of-the-art technologies from every aspect of the DevOps

### Qualifications:

- you are cloud-native and experienced with container technologies
- you have deep understanding of a mainstream cloud provider (e.g., AWS, Azure, GCP, etc.)
- experience in prioritizing competing stakeholder requirements with the ability to resolve conflicts
- you are expert at resolving, debugging, designing & implementing solutions to complex technical problems.
- you have deep experience with operating systems and with multiple types of SQL and NoSQL DBs.
- high level of experience in CI/CD pipelines (Azure DevOps, GitLab or similar)
- you have an understanding of programming/scripting in Python.
- basic AzureAD / O365 & Windows knowledge – not for the product 😊
- fluency in English

**APPLY NOW** – Please send your application to [jobs@iot-inspector.com](mailto:jobs@iot-inspector.com) if you think you are the right person for the job.
