

IoT Inspector is a security startup that develops a SaaS platform for organizations and cyber security professionals to automatically examine the firmware of IoT devices for vulnerabilities and conformance deviations. Join our team if you are enthusiastic about IT security, want to work with the latest technologies, and care to bring security to the IoT world. To grow our team we are looking for a

Q&A Engineer (m/f/d)

Thorough Q&A engineer to ensure the quality and the overall user experience of an IoT security product. The position is open to mid/senior/principal levels.

Location: Bad Homburg/Vienna/remote

WE ARE LOOKING FOR YOU IF YOU

- are a creative problem solver
- want to build a modern, quality scalable cloud application
- are interested in IT security (penetration testing, reverse engineering, vulnerability research)
- want to work with an enthusiastic team

QUALIFICATIONS:

- Experience with automated testing, E2E testing, TDD, BDD
- Experience with cloud-native software development, API testing, CI/CD environment
- Work experience in agile and remote teams
- High level of written and oral English
- Any experience or interest on IT security comes very handy (penetration testing, reverse engineering, CTF, etc.)

RESPONSIBILITIES:

- Build and maintain an automated test environment as part of the CI/CD pipeline
- Help establishing a test strategy and run test scenarios
- Cooperate with the developers to maintain the high quality of the product
- Work in close cooperation with others in an agile team
